

OCCUPATIONAL COMPLETION POINTS (OCP)

The Florida Department of Education (DOE) has undertaken the job of restructuring vocational education curricula to be more responsive to the needs of business and industry in Florida and to improve vocational education courses for secondary students preparing to enter the work force. This restructuring is based upon occupational clusters that share a common core of basic knowledge and competencies. Many occupational programs offer the option of occupational completion points. An occupational completion point is a group of competencies or skills for a specific occupation as identified by the Dictionary of Occupational Titles (DOT), an Occupational Employment Statistics (OES) code, or an industry-defined title. For students with disabilities in a job preparatory program one or more established occupational completion points may be pursued.

The following pages outlines the OCPs for each program offered in Levy County Public Schools. There are many places that you can access the OCPs. One is the actual Framework for each program.

The Web Site Link is: <http://www.fldoe.org/academics/career-adult-edu/career-tech-edu> - scroll down to the appropriate Career Cluster and then you will need to locate your particular Program. Most programs have been restructured to include OCPs. Technical Education is one area that is currently being restructured and there are not OCPs established at this time.

Another way to access the OCPs is the Workforce Development Information System (WDIS) Data Base Handbook or the Appendix S.

OCPs are another valuable way to market your programs.

OCPs are one way to determine Technical Skill Attainment for the federal Carl D. Perkins Grant. It is important for the classroom teacher, guidance, and data entry to work together to ensure accuracy.
